# Introduction and Document Setup

# Welcome to Text Styles 1.0!

---

Thank you for choosing Text Styles 1! Text Styles is a powerful and simple graphics design application especially tailored for creating impressive text artworks as quickly and painless as possible. You will benefit from lightning fast performance and ultimate simplicity. This user guide is supposed to give a comprehensive step by step guide to all essential tasks.

# The Text Styles user interface

---

- 1. Toolbar:** The Toolbar gives access to available text drawing tool and Group/Ungroup buttons.
- 2. Main Canvas View:** The main Canvas of Text Styles.
- 3. Styles Sidebar:** The Style Sidebar (or Right Sidebar) gives access to all available properties of the selected text and the styles.

## Document Settings

---

In the Document Settings you can adjust the size of the canvas as well as the settings for rulers and background color.

A screenshot of the Document Settings dialog box. At the top, "Document Units:" is set to "Centimetres" in a dropdown menu. Below this are two main sections: "Dimensions" and "Margins". The "Dimensions" section has "Page Width:" set to "320,00" and "Page Height:" set to "300,00". The "Margins" section has "Left Margin:", "Right Margin:", "Top Margin:", and "Bottom Margin:" all set to "0,0". Below these sections is a "Document Background Colour:" label with a small square color selection box. At the bottom left, there is a checked checkbox for "Live Preview". At the bottom right, there are "Cancel" and "OK" buttons.

Document Units: Centimetres

**Dimensions**

Page Width: 320,00

Page Height: 300,00

**Margins**

Left Margin: 0,0

Right Margin: 0,0

Top Margin: 0,0

Bottom Margin: 0,0

Document Background Colour:

Live Preview

Cancel OK

# Functions in Text Styles

## Add Text

---

Go to the Toolbar and click “Text” (T).

## Create a new document based on templates

---

In Text Styles you can either create a file from scratch or based on a preset. Text Styles comes with various presets to quickly create professional text artwork with just a few clicks.

## Edit Text

---

To edit added text go to the right sidebar - “Text” tab and change Font, Font Size. The Font List gives you access to all fonts available on your system. When you finish editing your text, click “**Convert Text to Shape**” button to apply a style.

## Apply Style

---

Text Styles comes with a huge variety of style presets. Style presets are essentially collections of style attributes that can be quickly applied to the text.

1. Select an object, go to the right sidebar and select the “Style” tab.
2. You can directly select a preset from the style collection.

## Export Text Styles files

---

Text Styles files can be exported in all common formats - PDF, JPG, PNG, TIFF and SVG. The export button can be found at the upper right side of the toolbar or from File - Export menu.
